We moved to another dive spot north closer to the marina. After entering I noted the terrain on the sea floor was much flatter. The bottom was caked in coral and seas grass. There was much more to see, the ocean was thick with marine life. We saw a seahorse, eel, lobster, angelfish, a lone barracuda, a parrot fish, queen tigerfish, and even a splendid toadfish- which can only be found in Cozumel.

Life was the bubbles in Cozumel for our dive! I have never seen a turtle chomping on coral like that before! We will definitely be back if we can!

Total zen on the float, 60 feet under. Nothing like achieving absolute buoyancy to wrap up a dive!

I found a dive shack on the beach across the street from my resort, had a beach dive set up in minutes and I was in the water immediately.

15 Minutes south from Mallory Square, and we dropped into crystal clear water teaming with coral and fish!

I tried live aboard life for the first time, and I think it might be the best way to dive! We had four dives everyday, and the crew took care of everything.
